HEALTHYCLOUD
Health Research & Innovation Cloud

→ VISION

- Paving the way for an effective health-related data sharing across Europe to maximise the impact of health research

- Conforming the future European Health Data Space by defining the Strategic Agenda for the European Health Research and Innovation Cloud

Towards the European Health Research and Innovation Cloud (HRIC)

Stakeholders' Forum

• Exchanging views on the future HRIC ecosystem
• Identifying challenges & opportunities

Roadmap

• Recommendations
• Specifications

Strategic Agenda

• Good practices for ethical & legal use of health data in EU
• Sustainable use of EU capabilities on computational systems

→ Objectives

- Interactions with stakeholders to ensure their voices are included as part of the Strategic Agenda.

- Inclusion of Ethical, Legal and Societal aspects in the design of the future HRIC ecosystem.

- Sustainable access, use and re-use of health-related data, available in several data collections spread in data hubs, considering a progressive adoption of the FAIR principles.

- Technological solutions in terms of computational facilities and mechanisms to enable distributed health data analysis across Europe.
